My memories of summer camp focus on the arts and crafts I did (waterskiing water wedgies are less enjoyable reminiscences). I enjoyed a hodge podge of activities: hand-tooling leather keychains, throwing pots, braiding lanyards. *Golden Age* reminds me of those summer days, except the crafts here are exquisitely made. And if you haven't had a creative experience since your own days at summer camp, *Golden Age* may well inspire you to tap back into your artistic side or if that's out of reach, just buy something here and hope the artistic expression will rub off on you.
